

ABSTRACT OF THE DISCLOSURE

A latex glove removal and disposal device including a container having an open upper end, a closed lower end, a front wall, a back wall, and opposed side walls. A cover member is dimensioned for positioning over the open upper end of the container. The cover member has a closed upper end, an open lower end, a front wall, a back wall, and opposed side walls. The front wall of the cover member has an opening therethrough. A glove removal apparatus is secured to the container and is positionable between a person's wrist and an opening of a latex glove to facilitate removal of the latex glove from the person's hand.
